NATHAN STORY

Warrenton, MO | 636-699-3850 | nathandstory@gmail.com | github.com/nathandstory

PROFESSIONAL SUMMARY

Agricultural Systems Technologist & Developer bridging **Computer Science**, **Automation**, and **Hands-on Trade Skills**. Designs integrated systems from software automation pipelines (Python/C++) to physical infrastructure (Electrical/Structural). Uses AI tools, including Claude Code, Codex, and local model workflows, to accelerate development and solve practical problems. Seeking a full-time role that values innovation and practical execution, either remote or local to the Warrenton, MO area.

CORE COMPETENCIES

Agricultural Technology

Irrigation System Design, GIS Mapping, Precision Agriculture, Soil & Permaculture Systems, Soil Amendments.

Technical Trades

Electrical (AC/DC, 100A+ Service), Plumbing (PEX/Copper), Framing, Welding, Solar Power.

Software & AI Automation

Python, C++, Java, Linux/Windows, Docker, ESP32/Arduino, Claude Code, Codex, AI Agents, OpenAI/Anthropic APIs, Ollama, ComfyUI.

General Skills

Project Management, Customer Relations, Interpersonal Communication, Quality Control, Rapid Prototyping, Problem-Solving.

EXPERIENCE & INDEPENDENT PROJECTS

Independent Projects & Professional Development

2022 – Present

Raising a family, building a homestead, renovating a home, and learning AI through self-directed study and personal projects.

- **Software & AI Development:** Built Python workflows and tool-calling agents to automate personal tasks and organize data; used Claude Code and Codex for prototyping and code refinement.
- **Generative AI & Web Development:** Built locally automated AI image and video pipelines using Krea 2 and MiniMax H3, combining visually consistent assets with automated background removal to accelerate web design and development.
- **Agricultural Automation:** Established a Zone 6 food forest with 30+ cultivars matched to soil and site conditions; developed environmental monitoring with custom IoT sensors.
- **Infrastructure Renovation:** Executed a full-scale residential renovation including the design and installation of two 100-amp electrical sub-panels, complete plumbing systems, framing, drywall, and trim.
- **Energy Systems:** Engineered and installed a standalone solar power system including inverters, amplifiers, and battery backup storage.

Grain Elevator Operations Intern | *Bartlett Grain*

Summer Internship

- Managed grain logistics and operational flow within a high-volume elevator system.
- Gained hands-on experience with industrial agricultural machinery and safety protocols.
- Analyzed system bottlenecks to improve throughput and efficiency.

Server | *O'Charley's Restaurant + Bar*

2018 – 2019

- Built rapport with guests and delivered attentive service in a busy restaurant, using strong communication and interpersonal skills.
- Resolved customer concerns under pressure and coordinated with kitchen staff to keep orders accurate and service running smoothly.

Manufacturing Associate | *Newco Enterprises*

Jun 2015 – Aug 2016

- Performed precision assembly and electrical wiring for commercial coffee brewing equipment.
- Served as the final Quality Control checkpoint, ensuring 100% adherence to electrical and mechanical specifications before shipment.

EDUCATION

B.S. Agricultural Systems Technology

University of Missouri (Mizzou)

2019 - 2022

Minor: Agribusiness

Relevant Coursework: Structural Engineering, Irrigation System Design, Electrical Systems, Mizzou Soils 2100, Physics, GIS.

Computer Science & Engineering Coursework

Missouri University of Science & Technology (Missouri S&T)

Focus: Computer Engineering, Data Structures, Algorithms. GPA: 3.6/4.0

CERTIFICATIONS

- **Pesticide Applicator License**
- **CompTIA A+**
